

BLUE GIANT®

AFTERMARKET SOLUTIONS

***Guides the trailer safely
and accurately to the
center of the dock***

Blue Giant reflective guides provide the most effective method for safely guiding trucks into the correct position at the loading dock.

Superior Truck Guidance

Reflective guides are installed on the wall below the dock bumpers, advising drivers where to position the trailer. Centering accuracy is improved by up to 300%, even in poor-visibility weather conditions.

Higher Visibility

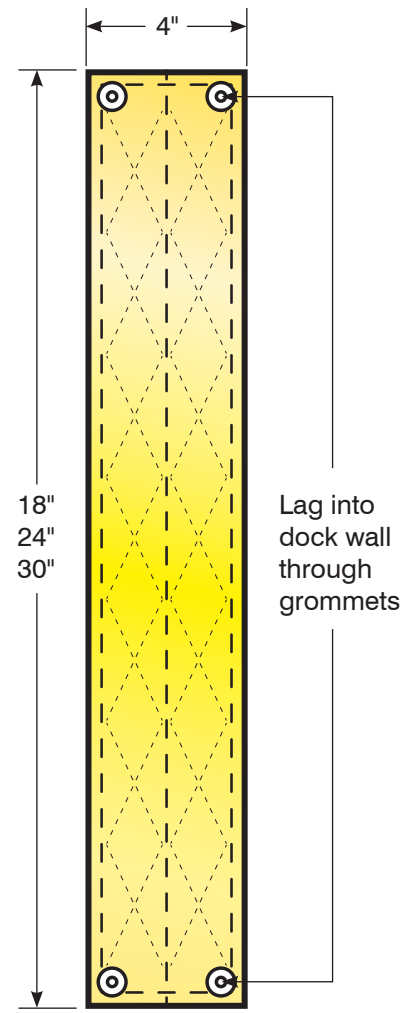

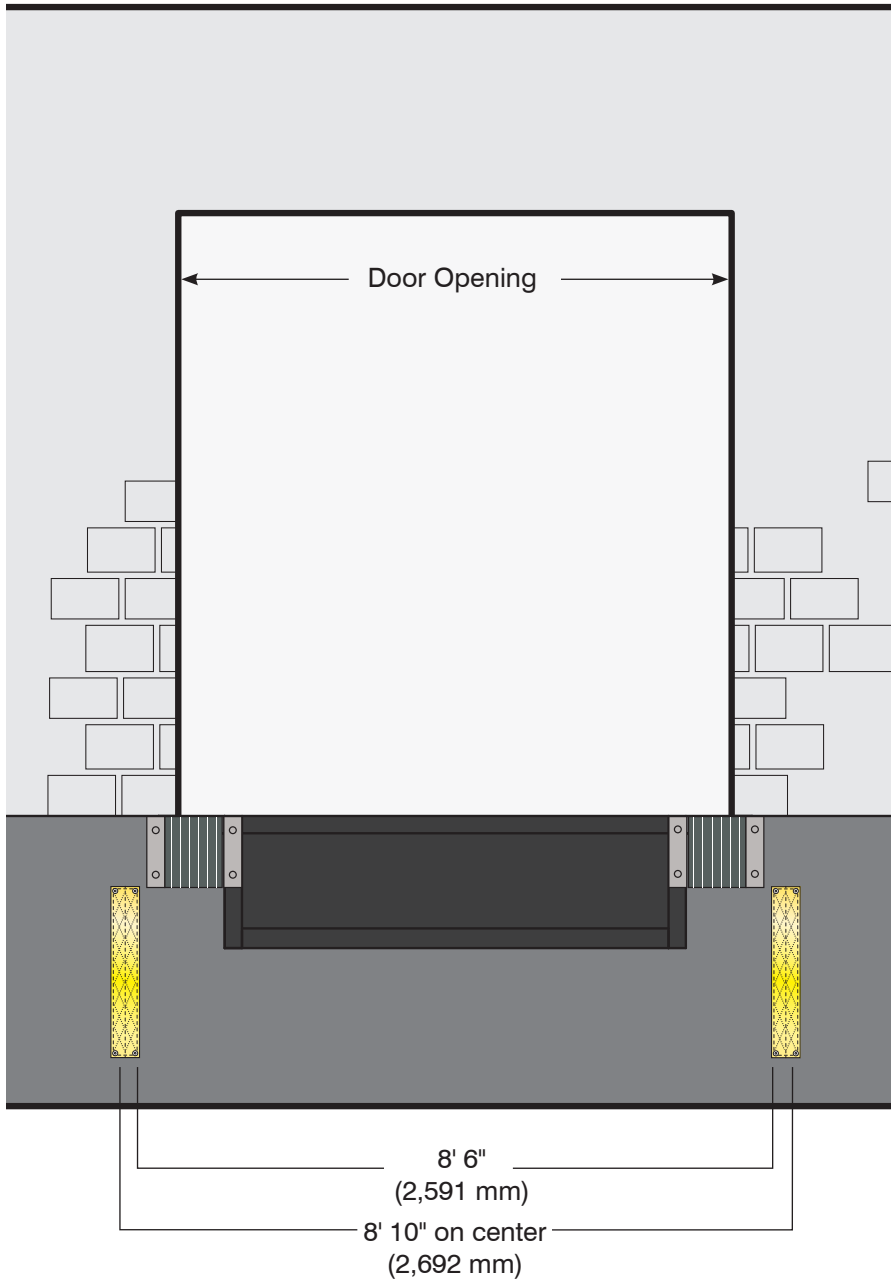

The unique and concentrated design returns four to five times the light intensity of standard bead reflectors. No electricity is needed, and the guides have no bulbs that can burn out and require maintenance.

The Blue Giant Advantage

- Installation only takes minutes
- Provides excellent trailer guidance for indoor trucks
- Zero energy use
- Available in 18" (457 mm), 24" (610 mm), and 30" (762 mm) lengths

Reflective Guides

Installation Instructions

Reflective Guide

PART NO.	DESCRIPTION
70-0001-18	4" x 18" (102 mm x 457 mm)
70-0001-24	4" x 24" (102 mm x 610 mm)
70-0001-30	4" x 30" (102 mm x 762 mm)

WARNING

Be sure to post safety warnings and barricade at dock level to prevent unauthorized use of the dock area while service work is being performed.
Reflective guide installation: Damage to dock shelter, leveler and dock may occur if reflective guide is improperly installed.
