- IMPROVE working conditions & by keeping dust, dirt, debris insects out
- PROTECT product & personnel from harsh weather conditions
- INCREASE PRODUCTIVITY by providing a safe & comfortable working environment
- DURABLE range of Hi-Performance fabrics to choose from
- CUSTOM sizes available

Standard Size Specifications

Generally designed to suit 8' wide x 10' high openings.

This unit is used to seal higher door openings. A top header curtain is supplied with a rope & pulley system that can be raised and lowered to suit a variety of truck heights.

Two foam side pads seal the gap between the building wall and the truck.

With one of the largest selections and colours of fabrics available, Blue Giant can offer the ideal solution for your unique loading dock requirements.

PVC DROP CURTAIN

Low temp PVC strips can be used for non-adjustable applications to suit a variety of trucks.

VELCRO SPLIT

A velcro split between the side pads allows the centre section of the curtain to be adjusted even after the truck has docked.

FIXED FOAM FACE

A 4" thick foam pad is sewn onto the face of the fixed curtain to ensure a tighter seal.

HALF FOAM FACE VELCRO SPLIT

The top half of the curtain has a 4" thick fixed foam pad while the bottom of the curtain has a velcro split.

FULL FOAM FACE VELCRO SPLIT

This unit comes with a 4" thick full foam face pad for a tighter seal. A velcro split allows the bottom portion of the curtain to be raised and lowered accordingly.

Wear Flaps Provide Extra Protection

To maximize long term performance of your dock seal, overlapping flaps are applied at the corners of the head curtain (for velcro split style only) and the full height of the side pads. The wear flaps will absorb the abrasion that occurs at high wear areas. Wear flaps are available with 4", 6" or 8" exposure. Available in a wide range of fabrics & colours.

4" EXPOSURE

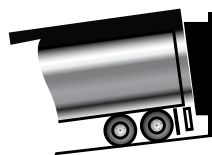

6" EXPOSURE

8" EXPOSURE
